

Step 04 baseline-aligned overlay diagnostic

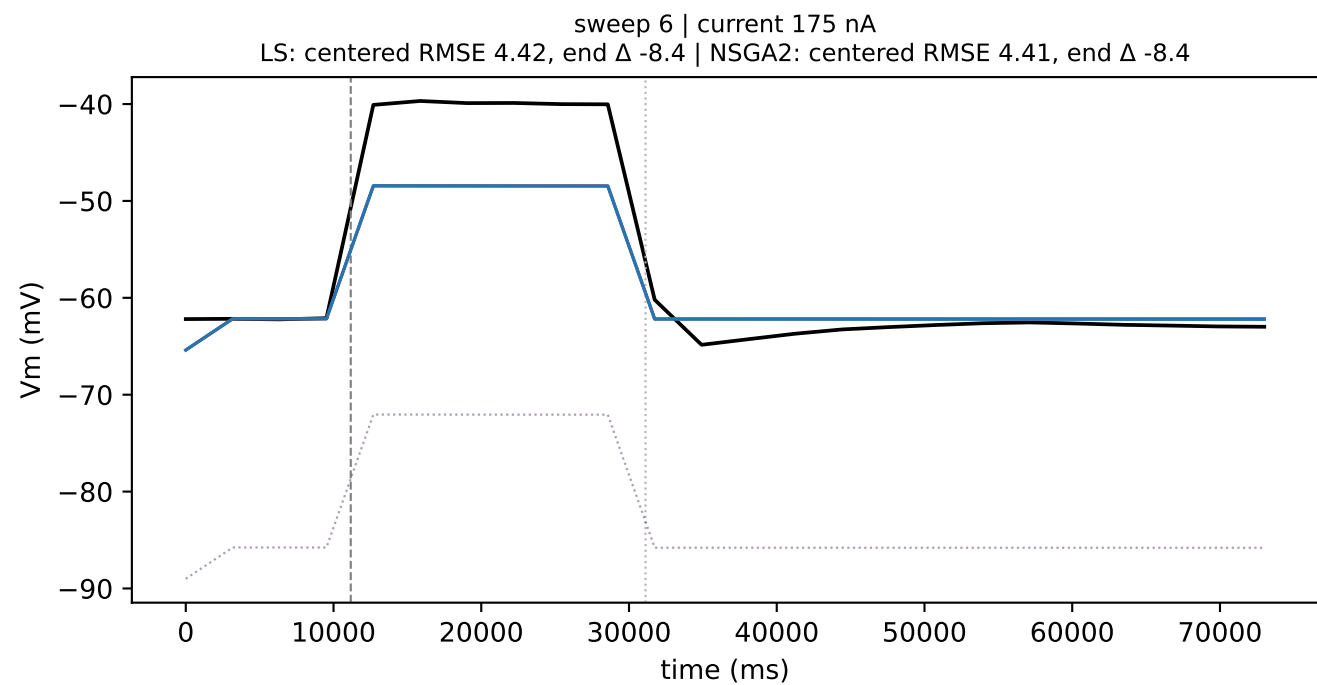

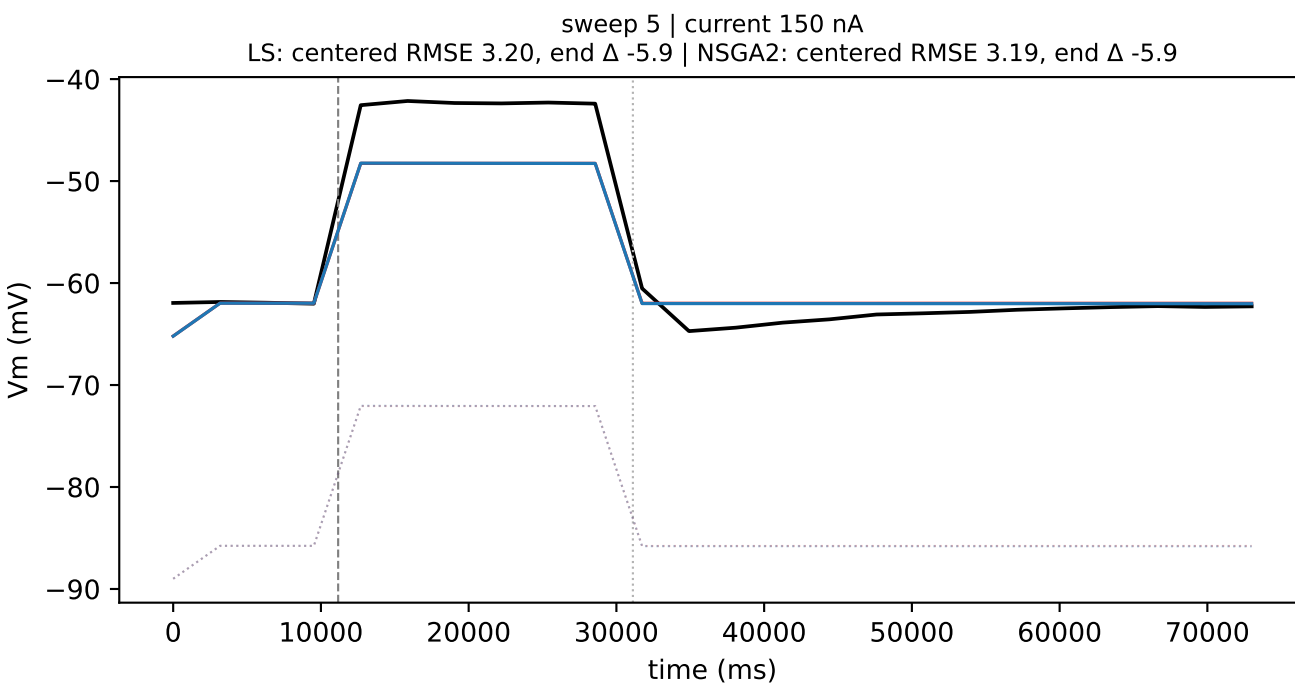

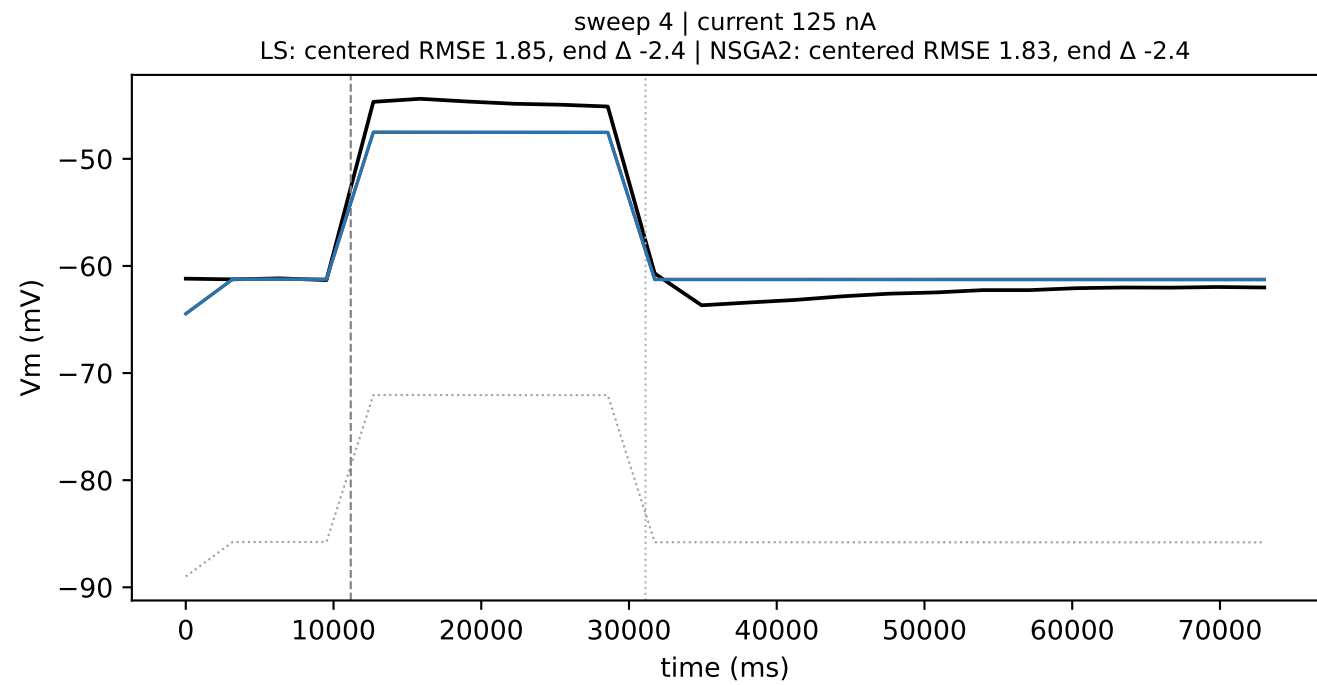

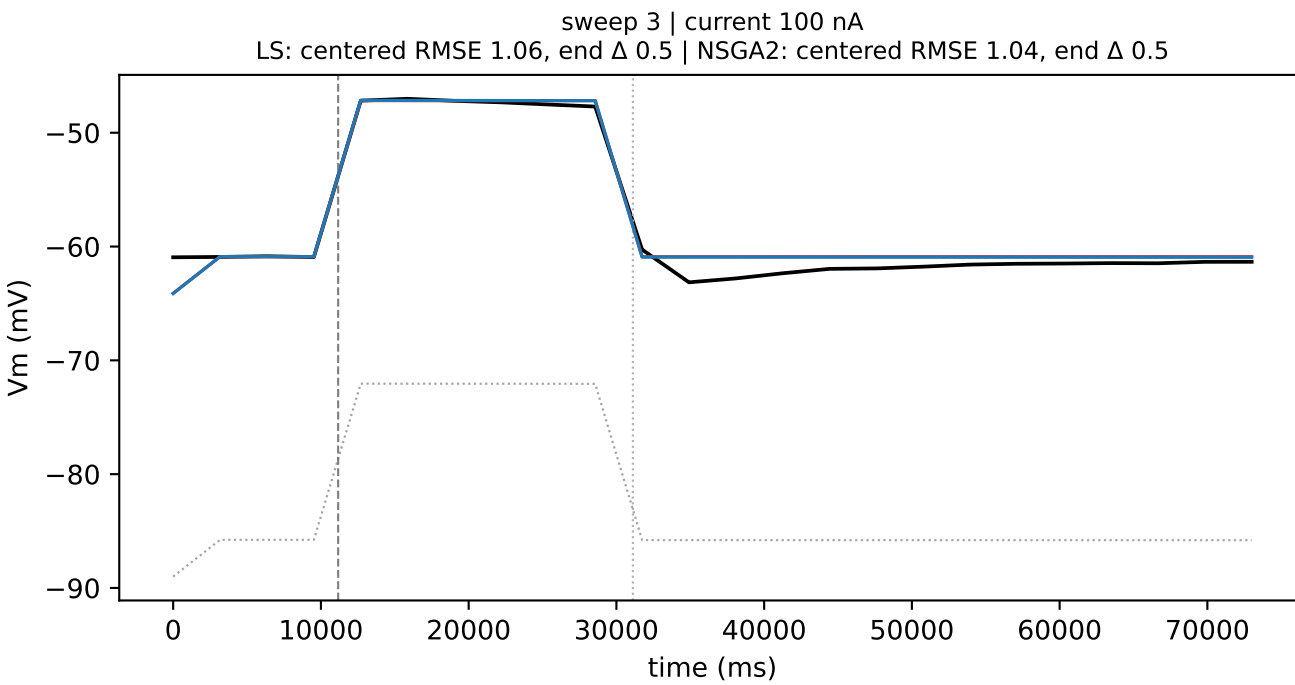

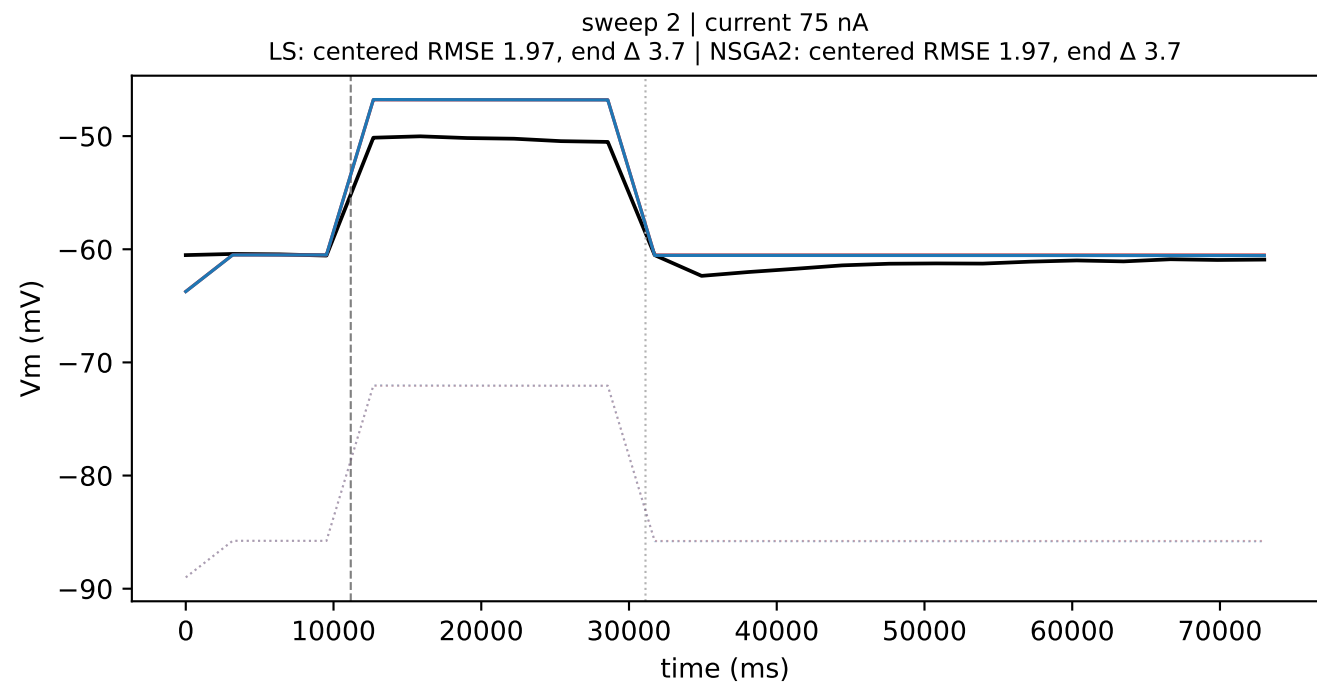

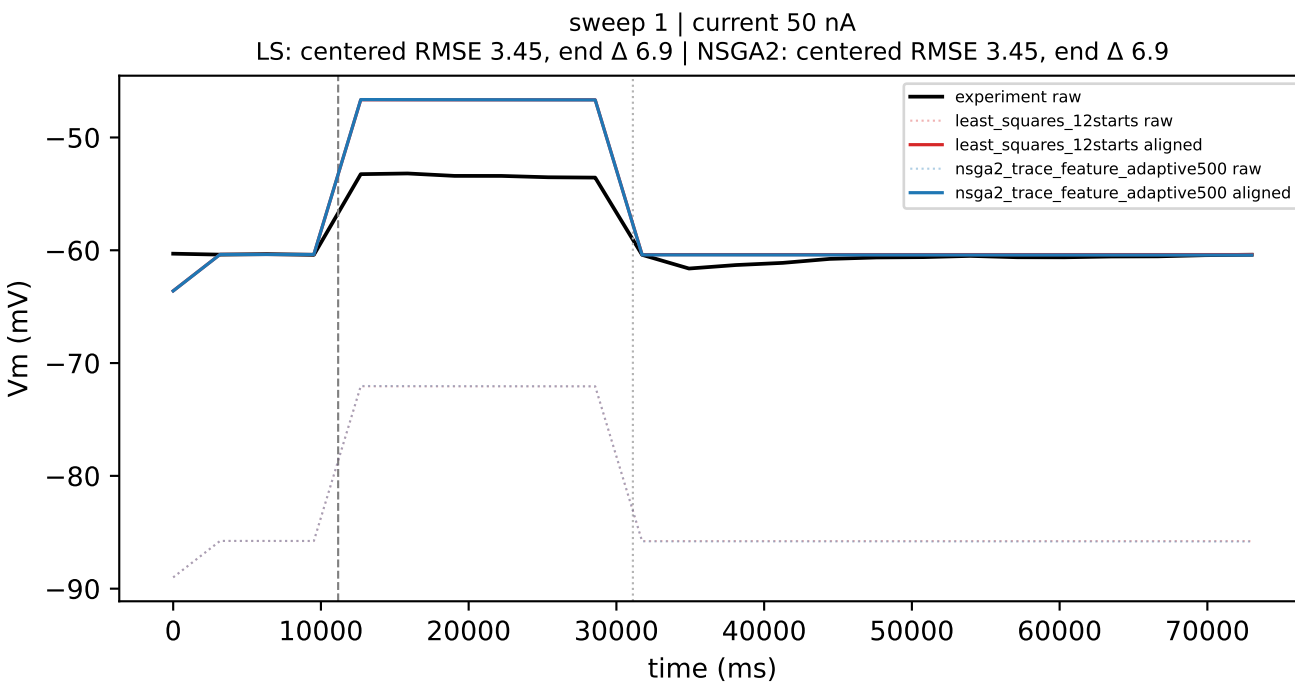

Solid colored traces: fitted Vm shifted to the experimental pre-stimulus baseline.

Faint dotted traces: raw model Vm from the old overlay convention.

Trace RMSE in Step 04 is computed on baseline-centered traces, not raw absolute Vm.

	strategy	n_sweeps	median_abs_baseline_delta_mV	mean_abs_baseline_delta_mV	median_raw_rmse_mV	media
	least_squares_12starts	42	24.711	28.594	26.743	
	nsga2_trace_feature_adaptive500	42	24.704	28.358	26.828
